

# 15B Series K

Gas Fired Water Boiler

The 15B-K is a gas-fired residential boiler with quiet and highly efficient operation. It's energy saving features include the electronic ignition system and motorized vent damper.

The 15B-K offers more installation flexibility with water, gas and electrical connection options available out the left or right sides of the boiler.

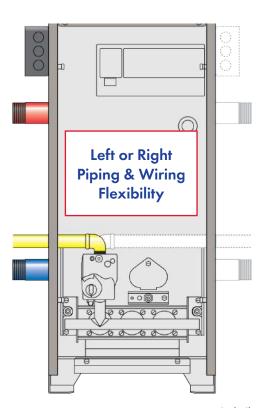

7 Models available offering inputs from 59 - 235 MBH.

#### **PRODUCT FEATURES**

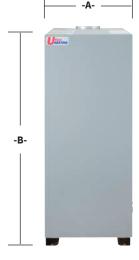

- 84% AFUE Efficiency
- Features a dependable cast-iron heat exchanger with dry leg end sections. Each cast-iron heat exchanger is water and pressure tested prior to assembly.
- Internal Operating Control features digital display and diagnostics. Control adjusts the water temperature based on the heating system demand to reduce your heating costs.
- Factory installed gas valve and low water cut-off (LWCO)
   protects the boiler from potentially dangerous low water conditions.
- Removable burner tray allows for easy cleaning and quick access to change orifices: LP gas, high altitude.
- Includes a low profile draft diverter hood reducing installation height by up to 30" when compared to models with external hoods.
- Warranty: 20 Year Limited Warranty (Residential)

## 15B Series K

### **Standard Equipment:**

- Boiler Jacket
- Parts Box: Drain Valve, 30 psi Relief Valve, Pipe Nipples, Reducing Couplings, Bushings, T&P Gauge, J-Box, Close Nipple, Tee, Circulator Harness.
- Damper, Draft Hood
- Options:
   High Altitude Orifice Kits,
   LP & Natural Gas Conversion Kits

Front

Left Side

Included Parts Kit

CONNECTIONS	ELECTRICAL				
Water Return/Supply: 11/4" NPT	120 Volts AC, 60 hertz, 1 phase, less than 12 amps				
let: 1/2" NPT (3/4" NPT on 15B-205K/235K)	(15 amp circuit recommended)				

Gas Fired Water Boiler

- (1) Input rating for sea level to 2,000 ft. (610m) above sea level. United States, over 2000 ft (610m) above sea level. Reduce input rate 4% for every 1000 ft (304m) above sea level.
- (2) Net AHRI Water Rating shown based on piping and pickup allowance of 1.15. Consult manufacturer before selecting boilers for installation having unusual piping and pickup requirements, such as intermittent system operation, extensive piping systems, etc.
- (3) Refer to IOM and vent pipe manufacturer's instructions for approved venting materials and installation methods.
- For forced hot water systems where boiler and all piping within area to be heated, boiler may be selected on basis of its heating capacity.
